- 02:25:02 Conor Sullivan: <https://gedcollaborative.com/article/screening-tools-high-risk-older-adults-emergency-department/>
- 02:35:04 Don Melady: The Clinical Frailty Scale has been implemented in many EDs. It captures many of the same components as the ISAR. More information here: <https://www.dal.ca/sites/gmr/our-tools/clinical-frailty-scale.html>

- 02:42:36 Don Melady: Dr Gossack-Keenan just received a grant to implement a Geriatric Comfort Cart at the hospital where she will be staff!
- 02:42:52 Laura Stabler: <https://gedcollaborative.com/wp-content/uploads/2022/04/Geri-cart-2021.pdf>
- 02:44:41 Laura Stabler: <https://emblog.mayo.edu/2020/05/26/geriatric-cart-to-provide-comfort-to-seniors-in-the-emergency-department/>
- 02:46:57 Don Melady: ED clinicians are always dubious that we "miss" as much as much delirium as the literature keeps reporting. We're really good at identifying the hyperactive delirium — but that represents only 10% of all geriatric delirium. We are NOT good at identifying the 70% of hypoactive and 20% of mixed delirium.
- 02:49:58 Lauri McCoy: Replying to "Dr Gossack-Keenan ju..."

Wonderful. What will be on the cart?

- 02:57:22 Don Melady: Please do not submit as your GEDA process your already existing in-hospital falls prevention policy. The intervention in the ED needs to be forward-looking, both addressing the consequences of the current fall and strategies for preventing falls after leaving the ED.
- 02:57:51 Laura Stabler: <https://gedcollaborative.com/toolkit/falls-and-safe-mobility-2/>
- 03:02:13 Jean Gordon: off-shift the pt gets a referral to PT?
- 03:04:05 Pamela Martin: We utilize ED observation often now for PT if patient is unable to ambulate in ED. Care management works until 8PM and will set up home referrals for nursing and PT if patient can ambulate but we need a home safety evaluation
- 03:05:21 Don Melady: This would be a good example of the value of reaching out to community partners. ED staff often find that there is a lot more available in the community than they thought. e.g. PT followup
- 03:09:21 Kevin Biese: And to get accredited, you need to demonstrate that your care process is happening at least frequently (so does not have to perfect but has to be happening)
- 03:14:14 Laura Stabler: GEDC membership info on upcoming slides
- 03:14:36 Laura Stabler: Gedcollaborative.com
- 03:16:25 Cortlyn Jeter: We are trying to develop a screening system for polypharmacy. Do you have any recommendations in reference to developing workflows for Geriatric ED medication safety or screening tools?
- 03:17:01 Lauri McCoy: As an individual does each person have to have the letter from our system?
- 03:17:13 Lauri McCoy: to join GEDC
- 03:19:57 Conor Sullivan: Hi Lauri, If your system leadership sends a letter of support for GED membership then EDs that are a part of that system do not have to include another letter. If your hospital is joining individually you will need a letter a support for your ED.
- 03:20:30 Pamela Martin: Cortlyn we included pharmacist consult in our Care signature pathways for falls and delirium. At my previous hospital, we had a dedicated ED pharmacist and a medication reconciliation pharmacist so the work flow was that the medication reconciliation pharmacist would do the consult for geriatric patients for discharge.
- 03:24:48 Catrina Cropano: Who is performing the medication reconciliation in the ED? The docs? The clinical pharmacists?
- 03:27:12 Rachel Koff: We have pharmacy techs input in epic and the nurses double check with the pt prior to being admitted

- 03:28:29 Natalie Elder: TOC
- 03:28:29 aaron malsch (GEDC) RN, GCNS-BC: We have pharm techs to do the reconciliation for admitted patients, we are attempting to develop some criteria where we can utilize this service for d/c patient. We know we will have limited access to the service so have to find the criteria to match their availability
- 03:29:18 Jamwanti Persaud: ISAR Wyckoff Heights Medical Center
- 03:29:50 Dora Fisher: Yes the May 8th at 1pm (in NY) Q&A with Nicole is a must if you have lots of questions!
- 03:30:37 Jaime Leppard: Falls ECMC Buffalo NY
- 03:31:05 Shannon Wales: ISAR - Mount Vernon and New Rochelle Hospital
- 03:31:06 Don Melady: Jaime, it seems like you're well-placed to expand a valuable resource.
