01:06:30	Pam Martin:	We have the modified caregiver screen built into our EPIC
01:06:34	Jennifer Wong: We are thinking about utilizing the modified caregiver strain index
01:07:31	Kevin Biese:	we have just written a few pieces on care givers visiting with AARP. I think that collaborative effort will result in more deliberate incorporating of care givers in the geriatirc ED
01:08:31	Pam Martin:	I've felt it helpful to give the caregiver the paper copy of the modified caregiver strain to complete while I do some of the other screens with the patient
01:08:48	Ula Hwang:	2 that I have heard used in the ED are modified care giver strain index (as mentioned by Jennifer), and the Zarit caregiver burden
01:10:04	Jeremy Swartzberg:	Our surgeons are using the FRAIL scale to quickly identify seniors at risk of poor surgical outcomes in the ED. Any experience with this tool? I did not find much data behind this tool.
01:11:18	Ula Hwang:	We will use FRAIL for a study and I will comment about it in a moment
01:11:41	Tess Hogan:	As part of an ACS task force for geri trauma, trauma surgeons also like the frail scale it is most common in surgical setting but poor studies behind it
01:12:57	Don Melady GEDC Faculty Toronto:	Completely unfamiliar with FRAIL. For use in an ED one wants something that is quick simple: you may not need the kind of information that a surgeon needing to make surgical decisions needs.
01:14:04	Michael Malone:	I need to jump off the call to join another group. thank you for letting me join.
01:14:13	Martha Radovich:	I really feel the cognitive assessment is critical to outcome.
01:14:45	Marlena Tang:	agree with Marti
01:21:07	Martha Radovich:	What I find is there are so many underlying psych issues with patients that are not formally diagnosed that make the cognition screening a challenge. It is so difficult to differentiate between dementia and a personality disorder.
01:21:08	Tess Hogan:	frail scale predicts outcomes https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4515112/
01:21:22	Jeremy Swartzberg:	great point Ula
01:23:21	Martha Radovich:	How often are patients that fail a mini-cog have further screening f/u for dementia?
01:23:23	Tess Hogan:	another frail scale article https://www.jamda.com/article/S1525-8610(18)30190-7/pdf
01:23:54	Todd James:	Thanks so much!
01:24:06	Tess Hogan:	Great to chat with you all!
01:24:09	Jeremy Swartzberg:	thanks everyone! that was great
01:24:15	Martha Radovich:	Thank You!
01:24:24	Pam Martin:	Thanks everyone
01:24:43	Jennifer Wong: Thank you!
01:24:51	Ula Hwang:	Thanks all!
